SHAFNY HADHY

Software Engineering Undergraduate | Associate Software Engineer

+94 77 369 0539 • shafnyhadhy@gmail.com • linkedin.com/in/shafnyhadhy • github.com/ShafnyHadhy

SUMMARY

Associate Software Engineer with hands-on experience building and maintaining production web applications. Experienced in developing features, troubleshooting issues, and contributing to reliable software used in real-world environments. Interested in writing clean, maintainable code, solving practical engineering problems, and continuously strengthening software engineering fundamentals while learning from experienced developers.

SKILLS

Languages	TypeScript, JavaScript, PHP, Java, Python
Frontend	React.js, Next.js, Tailwind CSS
Backend	Node.js, Laravel, Express.js, REST API Development
Database	MySQL, PostgreSQL, MongoDB, Schema design, Indexing
Tools	Git, Docker, Postman, Figma, DevTools, Composer
Concepts	OOP, MVC, Data Structures & Algorithms, JWT Auth, Secure Coding Practices, Testing & Debugging
AI & Automation	Claude API, Mistral API, Gemini API, OCR, Structured Data Extraction, AI Feature Integration, n8n, AI-Assisted Development

PROFESSIONAL EXPERIENCE

IT Starter Pvt Ltd | Hybrid

Associate Software Engineer | *Mar 2026 - Present*

- Build and maintain full-stack features for a live production product using Laravel, React (TypeScript), Next.js, Node.js and MySQL.
- Develop responsive interfaces and integrate them with backend APIs and database-driven functionality.
- Investigate application issues, identify root causes and validate fixes before production releases to help maintain application stability.
- Develop and maintain AI-powered OCR and document data extraction features using Claude and Mistral APIs in a live student portal, helping reduce manual document processing.
- Work with Laravel business logic, REST APIs, authentication, access controls and MySQL data.
- Collaborate with senior engineers through code reviews and technical discussions to resolve issues and improve implementation quality.

Intern Software Engineer | *Sep 2025 - Feb 2026*

- Developed full-stack features using Laravel, React, Node.js and MySQL, including REST API integrations and database-driven functionality.
- Implemented backend business logic, authentication flows, and role-based access controls using OOP and MVC principles.
- Integrated Gemini API into a receipt-scanning workflow to extract structured transaction data from receipt images and save it automatically, removing manual transaction entry.
- Automated bank transaction updates using n8n by connecting incoming bank notification emails to the application's transaction workflow.
- Used Git/GitHub, branching and code reviews while working within an Agile development team.

PROJECTS

Job Board SaaS API - GitHub

Node.js • Express • PostgreSQL • Redis • Docker • Prisma • JWT

- Built a multi-role job platform API with separate employer and job-seeker permissions, JWT authentication and Google OAuth.
- Implemented PostgreSQL full-text search using tsvector/tsquery to support efficient job searching.
- Added Redis caching with TTL-based invalidation to reduce repeated database queries for frequently accessed data.
- Added route-specific rate limiting and structured request logging with unique request IDs to improve API reliability and troubleshooting.
- Deployed using Vercel and Render with containerized backend services, PostgreSQL, and Redis.

Care Bridge - Healthcare Microservices Platform | GitHub

Node.js • Express • React • MongoDB • Docker

- Designed appointment and telemedicine services as independent microservices communicating through RESTful APIs.
- Containerized services using Docker for consistent, reproducible deployments across environments.

Coco Smart - Coconut Plantation Management System | GitHub

Node.js • Express • React • MongoDB • Supa base

- Developed marketplace and finance modules for a real-world plantation management platform.
- Built secure authentication and backend validation systems with RESTful API integration.

iBank - Online Banking System | GitHub

Java • JSP • Servlets • MySQL

- Built a full-stack banking system in Java covering authentication, account management, and transaction handling using OOP and MVC architecture.
- Designed relational database schema with MySQL including data modelling and SQL query optimization.

EDUCATION

BSc (Hons) in Information Technology - Software Engineering

Sri Lanka Institute of Information Technology (SLIIT) | 2023 - Present | CGPA: 3.6+

LANGUAGES

English • Sinhala • Tamil
